Definitions

These definitions exist for the purpose of this competition and will assist you in placing your artwork in the correct category.

Painting - Applying paint, pigment, color, or other medium to a solid surface. The medium is commonly applied to the base with a brush, but other implements, such as knives, sponges, and airbrushes, can be used.

Drawing/Printmaking - (Drawing) Using instruments to mark paper or other two-dimensional surfaces. Instruments include graphite, inked brushes, colored pencils, crayons, charcoal, chalk, pastels, erasers, markers, styluses, and metals (such as silverpoint). (Printmaking) The process of creating artwork by printing, mostly on paper, but also on fabric, wood, metal, and other surfaces. Printmaking processes can produce identical multiples of the same work and are created using a hand-processed technique.

Sculpture (3D)/Ceramics/Fiber Art - (Sculpture) Three-dimensional art. Sculpture processes include but are not limited to carving, assembling, welding, modeling, molding, and casting. (Ceramics)

Various hard, brittle, heat-resistant, and corrosion-resistant materials are made by shaping and then firing an inorganic, nonmetallic material, such as clay, at a high temperature. Common examples are earthenware, porcelain, and brick. (Fiber Art) Fine art, whose material consists mainly of natural or synthetic fiber and other components such as fabric or yarn. It focuses on the artist's materials and manual labor as part of the works' significance and prioritizes aesthetic value over utility.

Photography - The art, application, and practice of creating durable images by recording light, electronically using an image sensor or chemically using light-sensitive material such as photographic film. For the purpose of this competition, photographs taken with a digital camera are acceptable, but significant digital modification is not allowed in this category. Acceptable modifications include but are not limited to cropping, resizing, and slight (20% or less) color correction.

Digital Arts/Digitally-Manipulated Photography - (Digital Arts) Artistic practice that uses digital technology as part of the creative or presentation process, including art created using an Artificial Intelligence Generator. (Digitally-Manipulated Photography) Digitally editing a photograph more than 10%. Some examples of digitally manipulated photography are: using digital filters, manipulating color, saturation, tone, or vibrance more than 20% or in a manner that is not the natural or original color, pixelation, any photoshopping beyond basic edits (cropping, resizing, 20% or less color correction), erasure of elements in photograph, and recombination of images.

Mixed Media - Artwork in which multiple mediums or materials have been employed. Assemblages, collages, and certain sculptures are three common examples.

Jewelry/Metalsmithing - (Jewelry) Decorative items worn for personal adornments, such as brooches, rings, necklaces, earrings, pendants, bracelets, and cufflinks. Jewelry may be attached to the body or the clothes. Jewelry often contains precious metals in combination with gemstones or other materials such as shells. (Metalsmithing) The process of creating jewelry involves the manipulation of various metals. These manipulations include forming and shaping, sawing, doming, fold forming, drilling, soldering, texturing, stamping, and more.
